To NCKTC students,

You should have received a “Tool List” from Mr. Kopsa with a list of tools needed for the upcoming school year as well as a “Quote” for the tools from Matheson. This quote included everything we provide as well as an idea of the cost of some sized items such as the leather cape sleeves. Matheson has been providing these tools for a number of years.

Mr. Kopsa and I have worked together for several years to come up with a list of quality tools that will last for several years after you’re done at NCKTC. As in the past, if you purchase from Matheson and there are any issues; we ask that you contact us as soon as possible to get the problem resolved. During these uncertain times, we are not able meet face to face but you can order your tools from us by calling or emailing and we’ll get you taking care of.

Since things are different right now, we can either ship you your tool order or I will deliver them the first day of school next semester. We ask that the tools are paid for before they are either shipped or delivered.

If you want them shipped to you, you will need to pay the freight cost to UPS or FedEx which could be up to 30-40 dollars depending on the size of the order.

Matheson is looking forward to providing the tools needed for you to complete your welding degree.

Please feel free to contact myself or Viv Sidlo ([vsidlo@mathesongas.com](mailto:vsidlo@mathesongas.com)) at our store and we’ll get you taken care of.

Thank you and stay safe.

Best regards,

Mark Bonifas
